NO₂ Monitor at Town Hall

The Town Hall monitor records the average NO₂ concentration for each hour throughout the day as an indication of the level of air pollution. The monthly average for September was 35.5 µg/m³, and the annual average so far this year is 33.6 µg/m³, both of which are within the annual objective. There have been no further hourly exceedances this month leaving the total hourly exceedances for the year at 1. The ratified figures for January to March have now been released. Both the ratified and provisional (dashed line) concentrations are shown on the monthly average chart below.
