

Watlington Air Quality

NO₂ Monitor at Town Hall

The Town Hall monitor records the average NO₂ concentration for each hour throughout the day as an indication of the level of air pollution. The monthly average for February was 43.8 µg/m³ which exceeds the annual objective by 13%. The average for the year to the end of February was 44.6 which also exceeds the annual objective. There was one hourly exceedance during February when the hourly measure of 208 µg/m³ was 4% over the target, with 18 such exceedances allowed over the year. The monitor was out of action for two days in the month.
