NO₂ Monitor at Town Hall

The Town Hall monitor records the average NO₂ concentration for each hour throughout the day as an indication of the level of air pollution. The monthly average for March was 42.5 µg/m³ which exceeds the annual objective by 13%. The average for the year to the end of March was 43.9 which also exceeds the annual objective. There were no hourly exceedances during March which leaves the total at one this year, with 18 such exceedances allowed over the year. The monitor was out of action for three days in the month.
