

Watlington Air Quality

NO₂ Monitor at Town Hall

The Town Hall monitor records the average NO₂ concentration for each hour throughout the day as an indication of the level of air pollution. The monthly average for July was 30.1 µg/m³ which is typical for this time of year. The level for the year to date was 29.2 µg/m³ which is low. There were no hourly exceedances during the month. The monthly average graph below shows the ratified levels for 2017 and previous years, and the provisional levels for 2018.
